

Administrative Law Fellowships

The CALI Fellowship Project is a multi-year applied research effort to create computer-based learning materials in legal education. Both the process and the product will benefit faculty and CALI member institutions. The resulting materials receive internal review from the fellowship team and peer review from the CALI Editorial Board, and are published to law schools as part of the CALI Library of Materials. The goal of the project is to create a high-quality pool of electronic teaching materials for faculty to supplement their courses or locally customize for specific instructional goals, while providing an opportunity to explore computer-mediated /distance learning in legal education.

For Winter semester 2012, we are assembling a team of four or five faculty to become CALI Administrative Law Fellows. These faculty will receive focused training, extensive support and encouragement to create CALI Lessons.

To apply, you should review the CALI Topic Grid at <http://www.cali.org/content/cali-fellowships> and the article, "The Origin of the CALI Topic Grids" linked at this webpage.

Then send the statement expressing interest and reasons for participating, and your c.v.
